

Wireless-G Range Extender

Double The Range of ANY Wireless 802.11b/g Network.

HWUR54G

Intuitive User Friendly Setup

HOW IT WORKS

The Wireless-G Range Extender sits midway between your original wireless access point and the area that you wish to extend wireless coverage to.

SIMPLE SETUP

To setup the Range Extender you simply:

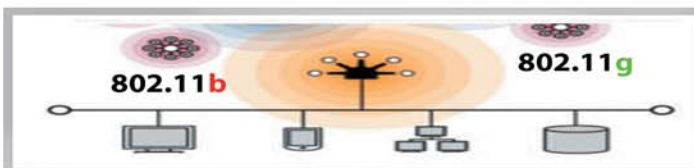

- 1) Enter in your SSID of your current Wireless Network in the configuration screen
- 2) Select the Correct Channel
- 3) Enter in your New SSID
- 4) Place the HWUR54G in the desired location.

Double the Coverage

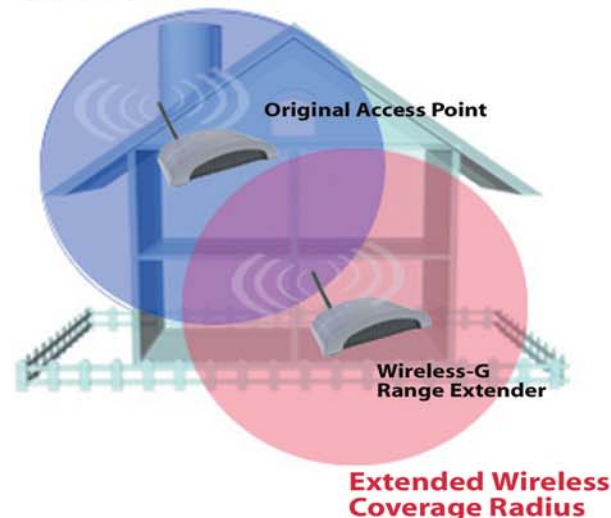

The Wireless Range Extender Takes the Signal from your Wireless Access Point and re-transmits it at a Boosted Level to Effectively Double your Wireless Network Coverage and Eliminates all Wireless Dead Spots.

Works with ALL Wireless Networks

Breakthrough Wireless Communication Technology Allows the Hawking Wireless-G Range Extender to Extend ALL 802.11b and 802.11g Wireless Networks Regardless of the Brand or Type.
