Find Your Operating System

(See the reverse side for Mac Installation Instruction. Refer the manual on the install CD for Windows XP Instruction)

Windows Vista /7

1. Insert the Setup CD and a menu page will automatically appear on your screen. Select Driver & Utility Install. Then, select a language and "next".
2. Wait until the installation completes. Then select "Next" in the following screen.
3. If you want to change any settings, click Back. Otherwise, click "Install" and wait while the Wizard installs the HWDN2 Driver and Utility.
4. When the installation is complete you may be prompted to restart your computer.
5. After the restart, plug in your Adapter. Windows will indicate that your network is not ready, select OK.
6. It is recommended for Windows 7 and Vista users to use the Windows Zero Configuration Utility. To connect, go to "Connect To A Wireless Network..."

Connect To A Wireless Network (Windows Vista)

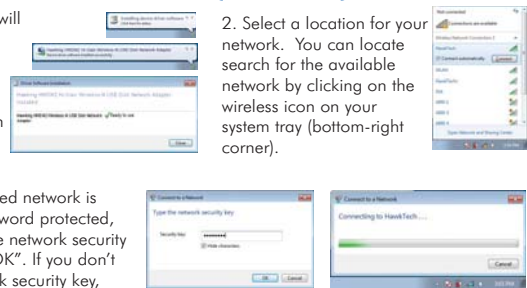

1. The Adapter will automatically search and locate an open network. Select a location for the network.
2. Select a location for your network. If your selected network is encrypted/password protected, please enter the network security key and click "OK". If you don't have the network security key, please contact your network administrator.

Connect To A Wireless Network (Windows 7)

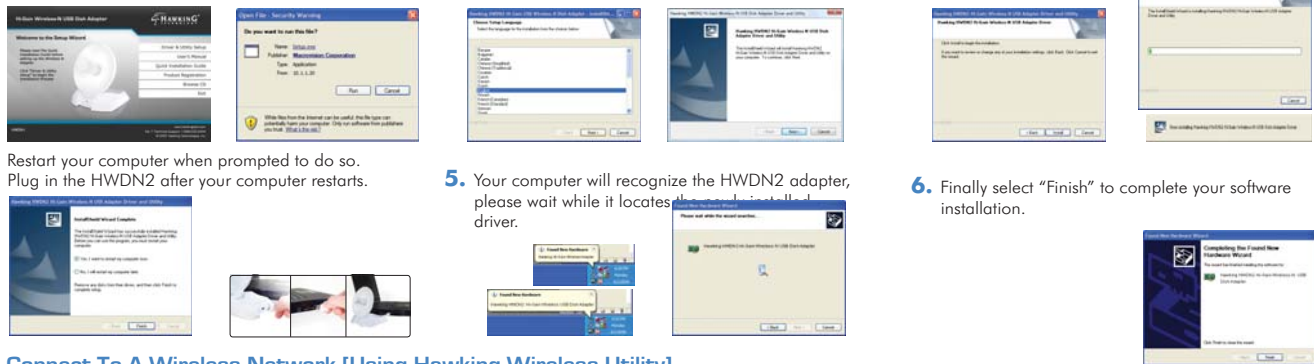

1. The Adapter will automatically search and locate an open network. Select a location for the network.
2. Select a location for your network. You can locate search for the available network by clicking on the wireless icon on your system tray (bottom-right corner).

3. If your selected network is encrypted /password protected, please enter the network security key and click "OK". If you don't have the network security key, please contact your network administrator.

Windows XP

1. Insert the Setup CD and a menu page will automatically appear on your screen. When prompted, select "Run" to continue.
2. Select a language, then "next". Wait until the setup completes, then select "Next" on the following screen.
3. Click "Install" and wait while the installer configures the HWDN2 Driver and Utility.
4. Restart your computer when prompted to do so. Plug in the HWDN2 after your computer restarts.
5. Your computer will recognize the HWDN2 adapter, please wait while it locates the installed driver.
6. Finally select "Finish" to complete your software installation.

Connect To A Wireless Network [Using Hawking Wireless Utility]

- A. To manually connect to a network, go to your system tray on your bottom right hand corner and click on the Hawking Wireless icon.
- B. From the Hawking Hi-Gain USB Wireless-N Dish Adapter Wireless Utility. Select the "Available Network" tab. Then choose a Wireless Network.
- C. Congratulations! You are now connected. To view your link status, click on the General tab. For more information, please refer to the User's Manual on the CD.

Important: Do not connect the USB adapter until you install the driver from the CD and are instructed to do so. Otherwise, the USB adapter may not operate correctly. Be sure to save all your work before continuing. Your computer will automatically restart after the driver installation.

Mac OS 10.4 or later

The Installation Screens may vary depending on your Mac OS.

Package Contents

- 1 x Wireless-N USB Dish Adapter
- USB Extension Cable
- CD: User Manual & Driver (Mac & PC)

Requirements

- PC or Mac Laptop or Desktop
- Windows XP/Vista or Max OS X 10.4 or later
- One Available USB port
- An available Wireless 802.11b/g/n Network

1. Insert the Setup CD and a menu page will automatically appear on your screen. Select "Click Here To Start".

2. Select the Mac OS X consistent with your computer. If you are uncertain about which Mac OS you are using, click on the APPLE icon on the upper-left corner of the Finder Menu bar and select "About this Mac" to view your current Mac OS X version.

3. Welcome to the Hawking HWDN2 Hi-Gain Adapter Driver Installer. Select "Continue". Read the Important information in the following screen and click "Continue".

4. Software License Agreement: select "Continue" and "Agree" in the following screen.

5. Select a destination and click "Continue". Select "Install" on the following screen.

6. If your computer is password protected, please enter your password to continue. Then, select "Continue Installation" in the following screen.

7. Please wait while the wizard installs the HWDN2 Driver. Select "Restart" when prompted.

8. Plug in the Hawking Wireless-N Adapter after your computer restarts.

Connect To A Wireless Network (Mac 10.5 or later)

- A. After plugging in the Adapter, the Hawking HWDN2 Wireless Utility will automatically pop up. You will be asked to enable your WLAN card. When the NOTICE appears, select "OK". Then, select "Network Preferences".

Please note the "Ethernet Adapter (en15)" network interface. You will need to enable this in the Network preference. The screen above shows "Ethernet Adapter (en15)" network interface, however the en number will vary from one computer to another.

- B. Enabling the USB Adapter in your Network Preferences. **Note:** In order for the Wireless-N Adapter to work properly, you must turn off any previously installed airport cards. To do this, go to the top right hand corner of your finder and select "Turn Airport Off".

- C. Select "Ethernet Adapter (...)" Then click "Apply".

- D. In the "Available Network" tab, select a wireless network and click on "Connect".

Encryption/ Password Protected: If your selected network is password protected, please enter the network key and confirm it.

- F. Congratulations! You are now connected. To view your link status go to "Link Status" tab. For more information, please refer to the manual located in the CD.

Connect To A Wireless Network (Mac 10.4~10.4.9)

- A. After plugging in the Adapter, the Hawking HWDN2 Wireless Utility will automatically pop up. You will be asked to enable your WLAN card. When a NOTICE comes up, select "OK".

- B. Enabling the USB Adapter in your Network Preferences. **Note:** In order for the Wireless-N Adapter to work properly, you must turn off any previously installed airport cards. To do this, go to the top right hand corner of your finder and select "Turn Airport Off".

- a) Click on the APPLE icon in the top left-hand corner and then select SYSTEM PREFERENCES.

- b) Select the NETWORK icon

- C. A New Network Port has been detected.

- D. Select the Newly Installed Port and click "Apply".

- F. Now go to the Hawking HWDN2 Wireless Utility and select a wireless network and click on "Connect".

Encryption/ Password Protected: If your selected network is password protected, please enter the network key and confirm it.
